

## Agenda Item Details

---

Meeting	Oct 18, 2016 - Regular Board Meeting
Category	G. Consideration and Possible Action
Subject	2. 2016 Facilities Master Plan
Type	Action
Recommended Action	The Superintendent/President recommends the approval of the 2016 Facilities Master Plan.

The District has planned and developed a comprehensive Facilities Master Plan over the last 16 months. As part of this process over 80+ meetings were held with external and internal constituency groups including 9 public forums at both campuses to seek community input. The community forums helped to full inform the process even more so and many of these ideas were adopted.

The Facilities Master Plan also takes into consideration the passage of the 2016 Measure B bond program and its impacts to both campuses in Kentfield and Indian Valley along with our single site in Bolinas.

This master plan takes into consideration soil conditions, flood areas, liquefaction, parking, updates to previous studies done during the previous bond, utility mapping of both campuses, facilities condition report and other reports that will become appendixes of the final FMP book.

Beyond the maps this document will be a very comprehensive document to be used throughout the Measure B bond program and will save resources in the future from duplicating work.
